Crane Training Courses Seattle - A crane is a type of machinery utilized to be able to lift, lower and move heavy stuff. A crane is often equipped along with sheaves, a hoist, and chains or wire ropes. Cranes are used in the transport, manufacturing and construction industries. These machines truly help with moving stuff, loading and unloading of freight, and heavy machinery assembly.

Cranes come in many various types. Each and every kind of crane is used for a particular use. Jib cranes are the smallest type, intended for indoor use. Tower cranes are the tallest kind, designed for building construction. In order to access tight spaces, mini-cranes are used. Floating cranes are used on water for salvaging operation and oil rig construction.

Crane operating procedure would be reviewed daily during the crane training course session. The implementation of proper overhead material handling procedures is covered in the course. Correct training means less maintenance costs and longer machine lifespan. The course instructs individuals participating in inspection and operating procedures focused on all operational factors, such as correct rigging and slinging. Participants can handle essential crane components in order to familiarize themselves with mechanical components. Lifting practices will be demonstrated together with recommended methods for review by your safety committee. Sessions would feature demonstration videos. The crane training course consists of a reference and resource instruction booklet.

The content of the course will cover codes about overhead cranes; machinery terminology, right inspection ways; attachments and hoists; basic maintenance requirements and procedures; correct sling use.

The kinds of machines that will be covered, consists of: All Types of Slings; All Kinds of Below-the-Hook Devices; Lever Hoists Hand Chain Hoists; Wire Rope and Electric Chain Hoists; Jib Cranes; Patented and light railed cranes; Standard overhead Cranes; Cab Operated Cranes; Magnet Applications; Radio Controlled Applications and Hot Metal Functions.

Inquire regarding our customized training, such as rigging training as a refresher; electric chain hoists for theaters, bilingual training in dangerous settings; high lifts; gantry, pedestal and jib cranes.
