Boom Lift License Seattle

Boom Lift License Seattle - Only fully certified individuals should operate an aerial boom lift. Qualification could be obtained through a combination of classroom sessions and practical training with the particular type of aerial lift that would be used on the job. A License is required for anybody who operates or works on an aerial boom lift.

Various types of vehicle-mounted aerial devices comprise aerial ladders, extensible boom platforms, articulating boom platforms, vertical towers, and whichever combination of these types.

When making use of a boom lift, there are several basic safety regulations that apply to all boom lifts. Safety of the worker is a main concern whilst they are working inside the basket. The worker must at all times have on a body harness and lanyard, connecting it to the basket or boom. Never tie off to a structure, equipment or an adjacent pole. Workers should stand on the floor of the basket, and never sit or climb on the edge of the basket. The manufacturer's load limitations should be followed.

Lift operators need to be certified to operate an aerial lift. The manufacturer's instruction manual must be kept in the lift and the operator should be familiar with all aspects of that specific unit. Operators are responsible for ensuring that safety measures are followed in the operation of the lift. Testing lift controls on a daily basis should be done. Position outriggers and set brakes (if they are utilized) on a stable surface or on pads. If working on a slope, make use of wheel chocks.

The aerial lift vehicle must never be moved while a worker is in the basket of an elevated boom, unless they are making use of machines which are specifically designed for this. Extensible boom platforms and articulating boom utilized as personnel carriers should have plainly marked, accessible, upper controls. Except for in emergency conditions, lower controls must not be used to override upper controls unless authorization has been given by the person inside the lift.

While working from an aerial lift, do not wear pole or tree climbers.
Do not alter the insulated part of the aerial lift.
Make certain that the booms are carefully checked, that the machine is correctly cradled and the outriggers are in the stowed position prior to moving.
When operating a boom lift next to power lines, make sure that the lines are di-electrically tested based on local regulations.
